

趣旨説明： What is HPC-Phys workshop?

Issaku Kanamori 金森 逸作 (理化学研究所 R-CCS)

2023年8月31日 @ 理研和光

第19回 HPC-Phys 勉強会 The 19th HPC-Phys workshop

Exchange Ideas for Computation

- Here we do not discuss physics, but methodology for computation with (super)computers
- Supported by JICFuS and a strong connection with 成果創出加速プログラム
△
- mainly particle, nuclear, and astro physics
→ more on condensed matter physics

Today's focus: algorithmic overviews from different fields

- **Interests in physics may differ for each of us, but we may share the same algorithms, difficulties (algorithmic/in using computers) etc.**
- **The first step is to know each other!**
- **Any one can interrupt the talk**
active discussion during the talk is one of the features of this workshop
- **Slides will be available at the website**

Thanks to...

- **Takumi Doi for the local organization**
- **RIKEN iTHMES**
- **And speakers and participants, of course!**
